

Farms of Tomorrow

Improve your egg supply quality through valuable insights of your incoming egg flow.

Farm Intelligence Unit

Increase egg quality

New data insights allow farmers to evaluate laying conditions and start actions to improve egg quality (e.g. feed or flock adjustments)

Automate quality control

This unit allows automation of the quality inspection of your incoming egg flow, so you can focus on supervision instead.

Added supply value

Pre-sorting by damage, dirt and size before packing allows farmers to start offering partners a clean, size-categorized egg supply

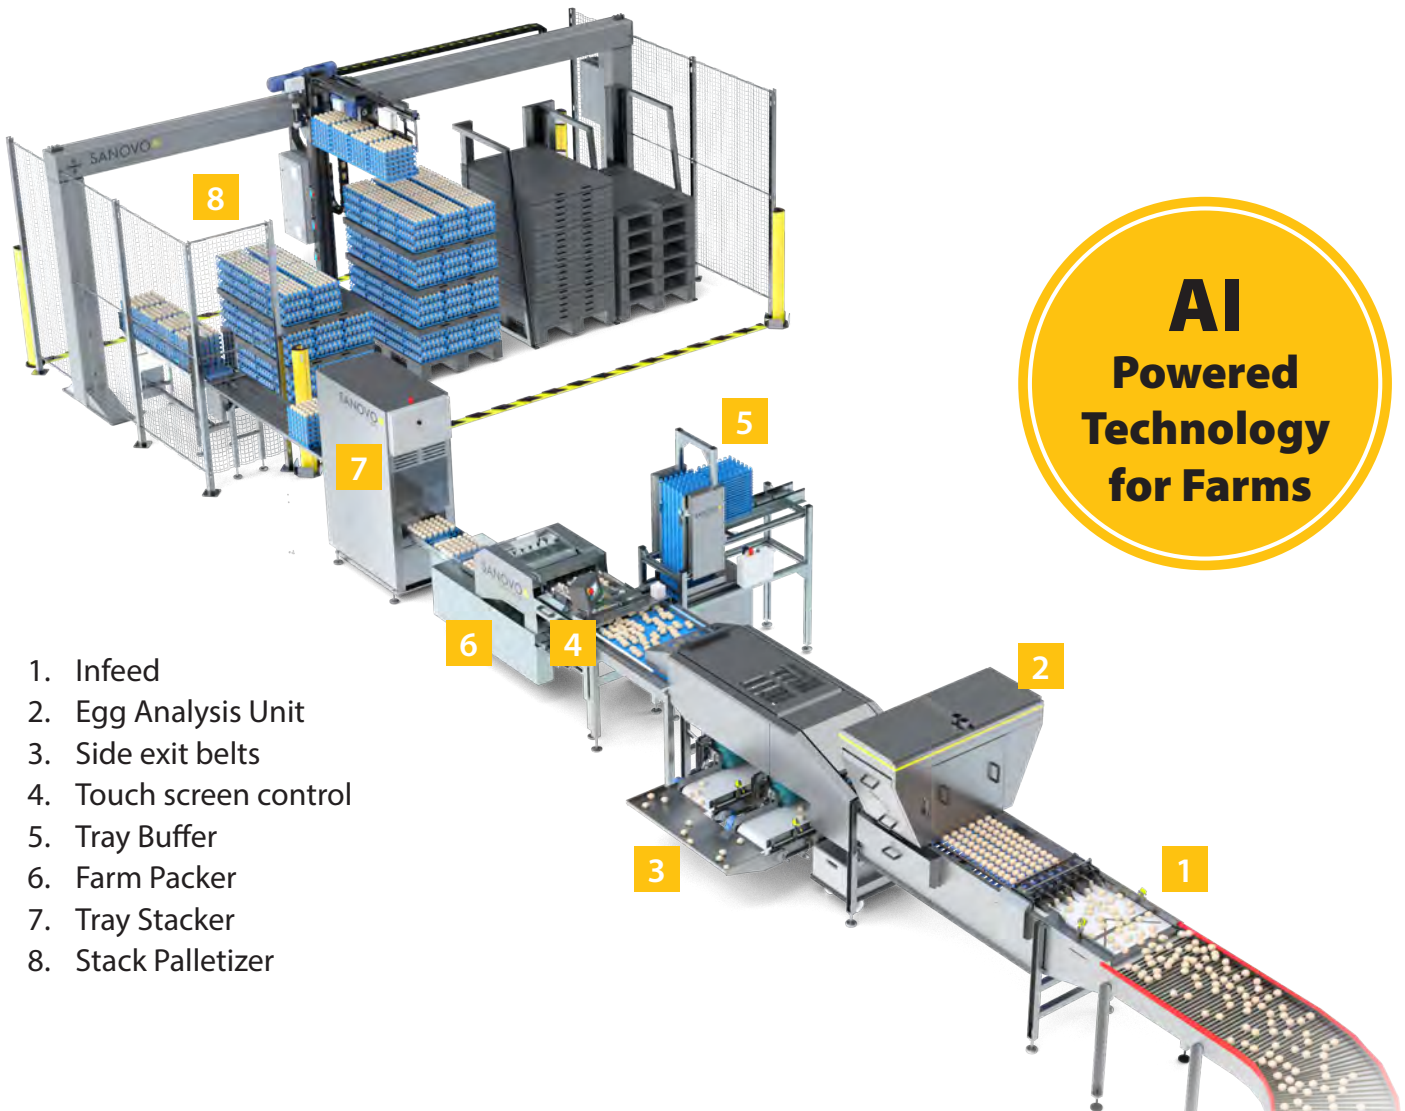

Smart design

Easy integration with existing packing setups, open structure for easy cleaning, smooth operation mode with exit belts to minimize interruptions.
